

The results listed on this page are from residential homes in Chicago that have requested to have their water tested for lead. The results are anonymized to the block level, so the complete address of each home is not posted. In cases where a sample tests over 15 parts per billion (the action limit set by the EPA), the Department of Water Management will contact the homeowner to discuss the results and schedule a time to resample the water and inspect the home's plumbing and electrical wiring to better evaluate possible causes.

The results listed on this page are from residential homes in Chicago that have requested to have their water tested for lead. The results are anonymized to the block level, so the complete address of each home is not posted. In cases where a sample tests over 15 parts per billion (the action limit set by the EPA), the Department of Water Management will contact the homeowner to discuss the results and schedule a time to resample the water and inspect the home's plumbing and electrical wiring to better evaluate possible causes.

*Samples were taken sequentially as 11th and 12th liter draws, not as 3 min and 5 min draws. Since 11th and 12th liter results trending down, no further sampling required.

**Required two sequential sampling events

The information listed on the following page(s) are residential homes in Chicago that requested to have their water tested for lead. Attempts to contact the resident were unsuccessful and post cards were mailed advising the resident to select a test type and mail back to the Department of Water Management.
